

## **The European Path towards 6G**

*Fitori Erzsébet - Smart Networks and Services Joint Undertaking*

This presentation will highlight how Europe is preparing for 6G by outlining the strategic vision, policy priorities and innovation efforts shaping the next generation of connectivity.

It will introduce the role of the Smart Networks and Services Joint Undertaking as Europe's public-private partnership driving collaboration between the European Commission, industry and research actors. The presentation will also provide an overview of current 6G research activities underway, including on standardisation, as well as future opportunities for investment and ecosystem development.
